## Energy Conservation features of the institution

- There are Sunny Airy Classrooms, Balcony, and Staircases in our college.
- LED bulbs are used everywhere in the college to reduce the current consumption.
- At the end of each class, students will turn off classroom fans and lights before leaving. It is an important best practice for us.
- Air Quality Monitoring Station has been set up in our college premises to measure the air pollution of the college and its surrounding areas.
- Regular maintenance of generator & electrical equipment.

**Sub: Requisition for installation of Air Quality Monitoring Station in the Panchthupi H.G. College  
Premise.**

Sir,

Request your kind consideration for installation of Air Quality Monitoring Station in our institution.  
We would abide by the rules and regulations of the West Bengal Pollution Control Board.

The nodal officer to be contacted for the installation of the Air Quality Monitoring Station in the  
Panchthupi H.G. College is Sri Alok Mukherjee ( Mobile No- 8101363530, email id -  
[alokmukherjee90@gmail.com](mailto:alokmukherjee90@gmail.com) )

We would also Provide uninterrupted power supply for the display board as stated.  
Thanking you for your kind support.

Sincerely

Principal

## Solid Waste Management Report:

**NECESSITY AND IMPORTANCE:** The accumulation of wastes in different forms causes serious environmental hazards. There are different types of waste disposed of in the college for which there is a proper system functioning. Our college follows the proverbial saying, 'Prevention is better than cure', meaning thereby, it is better to alleviate something hazardous or deleterious from happening than it is to deal with it before it gets cropped up and becomes intense. Therefore, we follow the dictum of '3Rs' - Reduce, Reuse, and Recycle. From the health, hygiene, environmental, and aesthetic point of view, the college ensures proper disposal of waste generated on the campus. The following wastes are being disposed of by the college.

- i) Institute has applied the NO PLASTIC POLICY to minimize plastic waste. The use of plastic carry bags, cups, and laminated paper plates is prohibited on the campus. Students and staff are advised to bring cloth bags.
- ii) Waste like metals, glass, cardboard, newspaper, and stationery are systematically collected, segregated, and sold to vendors for its recycling.
- iii) Single side used papers are reused for writing and printing in all departments. The college adopts an almost paperless concept through the digitization of office procedures through electronic means via WhatsApp as a group, email, and Google Meet; thus, reducing paper-based waste and reduce carbon dioxide emissions.
- iv) Plant clippings are used by local villagers in cattle feeding.
- v) Large-size dustbins are kept all over the campus for disposal of waste.

## REPORT on WATER CONSERVATION

Water scarcity is a growing concern, the only solution for which is water conservation. It is taken care of at different levels at Panchthupi Haripada Gouribala College-

- Realizing that rainwater harvesting is imperative for future water needs, Panchthupi Haripada Gouribala College has set up a rainwater harvesting unit within the College campus.
- The land of the college was identified for the Construction of a Deep Exploratory Well (Deep Tube Well) By Central Ground Water Board, Eastern Region & Division, Kolkata in hard rock areas of West Bengal and the work was completed successfully.
- Regular maintenance is kept of taps, drainage, and water pipelines.
- To ensure a clean and safe potable water supply, water purifiers with reverse osmosis are in the main block. The RO machines rejected water is then used for plants. The wastewater is carried out through the pipeline into the soffit.
- There is a deep-water tank(pond) inside our college, whose water can be used for firefighting also.

**Best practices of the College include the strategies adopted for the conservation of water in and around the College premises:**

- ❖ Reducing evaporation losses and recharging groundwater by planting and maintaining trees.use of recycled water for gardening.
- ❖ An active NSS Team and Eco Club with Staff coordinators, Students, and volunteers' chart various activities and programs to create awareness of environmental issues among students.
- ❖ Continuous monitoring of water usage and misuse in the College under the leadership of college authorities.
- ❖ Display boards for instilling alertness to conserve precious water resources are fixed near the water sources.

## SITE SELECTION REPORT

FOR CONSTRUCTION OF EXPLORATORY WELL (DEEP TUBE WELL) BY CENTRAL GROUND WATER BOARD, EASTERN REGION & DIVISION - XV, KOLKATA IN HARD ROCK AREAS OF WEST BENGAL

Name of the Site / Village :	PANCHTHUPI	Well No.	
Gram Panchayet / Municipality :	Panchthupi	Topo Sheet No.	
Block :	Barwan	Longitude	
Sub-Division :	Kandi	Latitude	
District :	Murshidabad	Reduced Level of Ground Level near Well	
Location in brief :	In the compound of Panchthupi Haripada Gouribala College on Dakshin to Panchthupi Road.		
Land of the site belongs to :	Panchthupi Haripada Gouribala College (Govt. Aided) Under Kalyani University.		

The above mentioned site has been jointly agreed to take up for Ground Water Exploration work including drilling operations and construction of tube well (s) for delineating the potential aquifers (water bearing zones) in the hard rock area as a part of scientific research work in greater public interest under the Exploration Programme of Central Ground Water Board, Ministry of Water Resources, RD & GR, Govt. of India.

  
 Ex. Engineer/

## Report on Green Campus

Panchthupi Haripada Gouribala College envisions the conservation and protection of energy resources for future generations. Our Mother Earth nurtures and nourishes us in our daily life, hence it is our responsibility to preserve and conserve the same. Keeping the issue of environmental protection in mind developing a green belt within the college campus is one priority area.

### Green campus initiatives include:

- Use of Bicycles
- Pedestrian Friendly pathways
- Restricted use of Plastic
- Tree Plantation drives
- Air Quality Monitoring Station for Panchthupi and its surroundings has been installed in our college under the initiative of the Pollution Control Board.
- Use of LED bulbs/power-efficient equipment.
- Rainwater harvesting
- Smoke-free zone.
- Installation of 30 KVA g
- Green Generator (Kirloskar Green)
- Different awareness programs of NSS and ECO CLUB to tackle the problem related to environmental hazards.
